### SUMMARY OF MEETINGS AND ACTIVITIES IN 2015

In 2015, CoMem's main project was to conduct a member survey on APS benefits and services. A small task force of committee members worked with staff to develop a survey instrument that was sent out electronically to a random sample of ~12,000 members in October. All member categories, U.S. and international, were sampled. Preliminary results show a response rate of approximately 15%. This is lower than in years past but still a good result considering current challenges with over surveying and filtering of messages. The Committee will use the next two meetings to sort through the data and formulate any recommendations to APS Council.

All CoMem members were again asked to hold a social event at their institution or in conjunction with another local meeting. These events are used to gain feedback from both prospective and current APS members on society services and programs. Committee members are reimbursed for any fees incurred with the activities.
