

June 9, 2021

The Honorable Eddie Bernice Johnson
Chairwoman
House Committee on Science, Space, and Technology
2321 Rayburn HOB
Washington, DC 20515

The Honorable Frank Lucas
Ranking Member
House Committee on Science, Space, and Technology
2321 Rayburn HOB
Washington, DC 20515

Dear Chairwoman Johnson and Ranking Member Lucas:

As a member of America's research and development (R&D) ecosystem, I want to thank you, your colleagues and your staff for your efforts in crafting the bipartisan *National Science Foundation (NSF) for the Future Act* (H.R. 2225). This legislation is a clear indication of your commitment to ensure robust federal investments in scientific research and the US STEM workforce, which fuel our economic engine.

By adding my name to this letter, I indicate my personal support for the *NSF for the Future Act*. This important legislation is the product of a strong bipartisan effort, informed by significant conversations with - and feedback from - the scientific community and additional stakeholders. This bill will strengthen the American scientific enterprise at a time of increasing global competition.

I support the *NSF for the Future Act* - the first comprehensive NSF reauthorization in more than a decade - for the following reasons:

- It will accelerate American innovation by both strengthening NSF's curiosity-driven, fundamental research and expanding NSF's use-inspired research. The bill does this through a balanced approach of pairing significant annual authorization increases for NSF's core programs with the creation of - and additional authorized funding for - a new Science and Engineering Solutions Directorate.
- It will bolster our STEM workforce. The bill will improve STEM education at all levels, support more of our best and brightest students by expanding the graduate research fellowship and traineeship programs, and expose students to a wider variety of career options.
- It will broaden participation in the nation's scientific enterprise, creating a US STEM workforce that is significantly more representative of our national demographics.
- It will expand and strengthen our research infrastructure. The bill authorizes strong increases for both major research equipment and facilities construction and mid-scale infrastructure programs, while ensuring that research capacity is increased at diverse institutions nationwide.

Thank you again for your leadership in working to ensure the United States continues to be a global leader in science, technology and innovation.
